To: Bill Lee

Bill & Sandra,

Thought you might enjoy a few photos of a successful day (Photos by Nancy). Got the body installed on the S/W with only one very small nick in the paint in an inconspicuous place. No one got their backs out of shape either. Eight of us lifted the body. Based on the weight that I was lifting, I estimate 500-600 pounds for the body. You missed some good brisket too!

Have a great trip

Bill

(Sandra and I were off on a month-long RV trip when Bill sent this along with the pictures.)
